How Accurately Can You Describe Yourself? An Inventory for Candid Descriptions

On the following pages you will find some adjectives -- common ones that are used primarily for the purpose of describing basic psychological traits. These terms can be used to describe others, or to describe oneself.

Please use this list to describe yourself, and do so as accurately as possible. Describe yourself as you generally are now, not as you wish to be in the future. Describe yourself as you honestly see yourself, in relation to other persons you know of the same sex as you are, and who are roughly your same age. So that you can describe yourself in a completely honest manner, your responses will be kept in absolute confidence, and no one will be permitted to see your self-description.

Beside each term, write a number indicating how accurately that term describes you, using the following rating scale:

Write if the term is:

1.....Extremely inaccurate as a self-description

2.....Very inaccurate as a self-description

3.....Moderately inaccurate as a self-description

4.....Slightly inaccurate as a self-description

5.....Uncertain, or the meaning of the term is unclear

6Slightly accurate as a self-description

7Moderately accurate as self-description

8Very accurate as a self-description

9Extremely accurate as a self-description
